## Featured Project: The Culinary Art Institute, NY

The Culinary Institute of America's \$19 million Marriott Pavilion, located in Hyde Park, NY, has hosted its first group of students on March 12th 2014 in its newly renovated theater and conference center, where three printed CLIPSO Panels were installed by Crestone Acoustical Solution, a certified installer from the CLIPSO Network.

This project included two acoustic (495D) large wall panels (15ft x 29ft) with reprints of 16th-century artist Giuseppe Arcimboldo's "The Four Seasons" located in the auditorium, and a third wall panel using the 705S covering with an image of group of Chefs bringing a fun design to a hallway. (12ft x 20ft).

## Training April session

CLIPSO held its second session this year – April 8th-10th 2014 – which included two days of basic training for our new installers who joined our national network and a third day of advanced training focusing on frames and lighting for those who wanted to become an expert in these particular areas. Installers came from all over North America to attend this sessions including Vancouver, Canada; Calgary, Canada and Las Vegas, NV.

Our technical team came from France to show attendees the latest techniques in lightbox assembly and diverse applications of stretch ceilings & walls, the latest cutting edge product in the industry.

If you would like to sign-up for the next training session please contact us at [khoward@clipso.com](mailto:khoward@clipso.com) or **646-422-0919 ext. 702** to check availability.

## Trade Associations memberships

CLIPSO Americas, Inc. became members of the following trade associations effective January, 2014 as follows: • CISCA – Ceilings and Interior Systems Construction Association • AIA – American Institute of Architects • IIDA – International Interior Design Association • ASID – American Society of Interior Design • USGBC – US Green Building Council.

We plan to share all the benefits of the organizations with our business partners to help you promote CLIPSO.

Do not hesitate to reach out to us if you hear of an event organized by these associations and need our support. Also, stay tuned for the AIA certified presentation provided by CLIPSO.

## Customize your ceilings and walls with CLIPSO Design

Large-sized printed decors have now become a must in interior design. The entire range of CLIPSO coverings may be printed with the exception of Specific coverings.

In order to transform the design of your interior, CLIPSO has partnered with the leading supplier of printing, wide format graphics, and display services in the United-States, Duggal Visual Solutions, Inc. established since 1963.

CLIPSO coverings' main advantage is to be able to cover a surface up to 16.8ft in width without any seem or joints. In order for CLIPSO to be able to offer such a service, a printing partner specialized in wide-span printing was needed.

Duggal's history and success demonstrated that they were the best in their field: In 1993, Duggal became the first company to fully wrap a building with a digital mural. In September 2009 Duggal was the first U.S. company to install a high resolution 16' wide (VOC free) UV printer. Their new Durst Rho 500 printer has 2048 nozzles per color (including white ink). In April 2010 they added a second Durst printer to join their array of 11 wide format and flatbed printers. These are the machines used for printing on CLIPSO coverings.

To provide quick turnaround and the best possible service CLIPSO works with local partners. Indeed, Duggal is based in New York City, with a headquarters in a one-city-block deep 30,000 sq/ft space on 29 West 23rd street and seven other production facilities in Manhattan and Brooklyn totaling over 160,000 sq/ft of space.

## Request your samples today!

Now available to our business partners, is a set of 4 frames made of CPA67 with printed samples: 495D, 705S, 307T and 309T. Each side of the frame is made of one of the four available colors.
