Performance Ceilings & Walls For The Interior Design Industry

Project of the Month

The Bordeaux Wine Center: *Cité des Civilisations du Vin*

To match the impressive presence of the Bordeaux Wine Center's exterior, architect Casson Mann selected CLIPSO® to complete the building's unique and engaging interior. Using 495 AC fabric in "Pepper," as well as matching PVC profiles, installers B2R and Plafond Tendance took just six months to outfit this space. The resulting design is full of visual interest and personality that matched the exact vision of the Center. The large room, which takes visitors on a journey through the wines of the world, helps make the Bordeaux Wine Center a can't-miss destination.

The CLIPSO® system is highly adaptable to any interior, working with and complementing whatever features are provided by the architecture. CLIPSO profiles bend to highlight the shape of this one-of-a-kind space with a beautiful finish. In addition, CLIPSO acoustic technology, provided by the 495 AC covering, helps ensure comfortable and optimized sound quality within the large busy space.
