Project of the Month

Residential Dining Room, Illinois Installer: The Huff Company

When the owners of this magnificent Victorian home needed to revamp their circular dining room, they turned to Huff Company to provide a solution that would add beauty and function to their family gathering space. Since this room hosts many family functions and holidays, improving the acoustic performance was imperative.

With that in mind, Huff Company selected CLIPSO® Acoustic 705 A covering which is available in White, Beige and Black. They also used insulation to assist in reaching their desired NRC value. In order to achieve this circular design, they used CLIPSO P-C10 profile which can be carefully notched to achieve any desired shape.

It took two installers just one day to complete the project. The entire ceiling was covered with CLIPSO coverings and a motorized chandelier was installed that can be raised and lowered for cleaning. The versatility of the CLIPSO system made it an ideal solution for this challenging, yet spectacular, circular interior design element.

Congratulations to the installation team at Huff Company on a job well done! For more information about the CLIPSO system, visit www.clipsoceilingwall.com. If you have questions or would like to inquire about using CLIPSO on your next residential or commercial project, please contact us at contactusa@clipso.com.
