**Project of the Month**

**Lebanon Valley College - Vernon & Doris Bishop Library - Annville, PA**

Installer: **Unique Construction**

Architect: **Breslin Ridyard Fadero Architects** • Independent Sales Rep: **S&S Resources**

When Lebanon Valley College decided to renovate their library, they imagined a vaulted ceiling running the entire length of the main room. To add interest to this scholastic environment, various college departments chose excerpts from iconic literary works to be printed inside the vault's ceiling. This not only created an interesting pattern within the vault but beckons all who discover this masterpiece to peruse and relish in its grandeur.

This 100' x 12' vaulted ceiling used CLIPSO 495 AC covering in Straw, P-CC profile, and LA 53 acoustical batting. CLIPSO was chosen for its superior acoustic properties as well as the ability to execute a custom print on an acoustic color covering (Straw). This gave the aesthetic of aged paper in a vintage publication. It took three installers five days to complete the project.

Krzysztof Borowik, President of Unique Construction says, "The final product looked wonderful. Everyone on site was very pleased with the final look. CLIPSO really is a top-notch product and the perfect choice for this kind of installation; both visually and acoustically."

Congratulations to the installation team at Unique Construction on a job well done! For more information about the CLIPSO system, visit [www.clipso.com](http://www.clipso.com). If you have questions or would like to inquire about using CLIPSO on your next residential or commercial project, please contact us at [contactusa@clipsoc.com](mailto:contactusa@clipsoc.com).
