The next generation
of ceilings and walls!

Introducing NEW Acoustic Colors and NEW Antibacterial Coverings!

We are pleased to announce exciting new changes to our fabric collections.

As you recall, in December of 2017 we launched our new brand identity which included a new logo and new product categories: SO Color, SO Clean, SO Acoustic, SO Light, SO Deco, SO Aero and SO Event. In conjunction with this launch, we have added some exciting new fabrics in addition to refining some of our collections.

Following is a recap of our current CLIPSO covering collections:

The SO Color collection includes several brand new colors in addition to our current 705 S Standard Color options, a refined 705 PA Pearlescent Color offering as well as a reimagined 495 AC Acoustic Color palette. As you will see, we have eliminated our 705 C Color offering and rolled the most popular colors from that collection into one comprehensive Acoustic Color collection offering an attractive and stylish color wheel sure to meet any of your acoustic color needs.

The SO Clean category now includes two new options. In addition to our current 705 NoStain and 705 AB Antibacterial coverings, we will now offer 308 T AB a 50% Antibacterial Translucent fabric and 495 D AB is an Antibacterial Acoustic fabric. Both are currently available in White.

The SO Acoustic category consists of the same 495 D and 705 A fabrics in White, Beige and Black, 495 AT in Translucent White and the updated 495 AC Acoustic Color collection.

The SO Light collection remains unchanged and offers 307 T (30%), 308 T (50%), 309 T (70%) and 495 AT (35%).

We hope you are as excited about the new fabric collections as we are. For more information, please visit our website clipso.com. Thank you for your continued business.
