

# Creating a Custom Print

## 1. Choose Fabric

<b>705 S</b>	Standard	<b>705 A</b>	Standard Acoustic	<b>495 D</b>	Acoustic	<b>495 AC</b>	Acoustic Color
<b>307 T</b>	Translucent (30%)	<b>308 T</b>	Translucent (50%)	<b>309 T</b>	Translucent (70%)	<b>495 AT</b>	Acoustic Translucent

## 2. Choose Image

Images can be:

- Selected from the many galleries on our website, [www.clipsoceilingwall.com](http://www.clipsoceilingwall.com)
- Selected from additional images found at the French Union of National Images, [www.photo.rmn.fr](http://www.photo.rmn.fr)
- Downloaded from [shutterstock.com](http://shutterstock.com) (or similar)
- Supplied by customer

### CLIPSO® Digital Image Format Requirements

**File Formats:** .TIF for photographic and fine art image files  
.EPS for solid color and vector-based files  
Files should always be uncompressed.

**Color Mode:** CMYK- RGB is not accepted.

**Resolution:** Minimum 150 DPI or 250 PPI at full size.

**Size and Proportion:** The image file must be scalable to full printing size. The width and height proportions will be locked during up-sizing. The image size must also include approximately two extra inches on each side, beyond the field measurements, to allow for the fabric to be tucked into the profile. You may print up to 16' wide by 150' long without seams, or larger by marrying up the prints during installation.

Files submitted for digital printing must be 'print ready'. It is important that customers ensure that files meet the CLIPSO Digital Image Format Requirements above. This means the file type, formatting, size, DPI/PPI and color mode of the image file submitted will match exactly with the file used in the printing process.

CLIPSO Americas is not responsible for printing errors that are derived from any inaccuracies in the 'print ready' file. If needed, the CLIPSO design team can assist with image modifications and digitization for a nominal fee.

*\*It is the customer's responsibility to obtain any licensing and/or copyright permission from the copyright holder for any images submitted to CLIPSO. CLIPSO takes no responsibility in verifying image copyright permissions for those images supplied by the customer.*

## 3. Order Your Print

### - Fill out the form

The Print Project Submission Form can be found on the CLIPSO website at [www.clipsoceilingwall.com](http://www.clipsoceilingwall.com). Once completed, return the form to [contactusa@clipso.com](mailto:contactusa@clipso.com).

### - Submit your image files

- Digitally
- Media Storage Device Mail-In: CLIPSO Americas, Inc. 200 Corporate Drive, Unit 4, Blauvelt, NY 10913

### - Quote/Signed Approval

Once the print-ready image file and Print Project Submission Form are submitted, CLIPSO Americas generates a quote for the final order and sends it to the customer. The quote must be signed and returned to CLIPSO Americas, via email, to [contactusa@clipso.com](mailto:contactusa@clipso.com).

## 4. Strike-Offs

A strike-off is a sample of what the final printed image will look like on the chosen fabric. They help the customer see exactly how the final printed product will appear on the selected fabric. The size of the strike-off is 2' by 2' and will be printed to scale (100% of final image). Only a small portion of the final full image will be printed. The customer may specify a sample area that they would like to see printed on the strike-off. It is recommended that the most critical or detailed area be test printed. Larger strike-offs, incurring additional costs, are available upon request.

A strike-off will not be produced without the customer's written approval of the project quote. The lead time to produce a strike-off is 5 to 7 business days from the time a print ready image file and Print Project Submission Form are received (does not include transit time). One strike-off and standard shipping is included in the total order price. After receiving and reviewing the strike-off, the customer must email approval of the strike-off to [contactusa@clipso.com](mailto:contactusa@clipso.com).

## 5. Final Image

The final print will be available for shipping approximately 7-10 days after final strike-off approval from the customer is received.
